Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

MutT2 protein; human; hMutT2; treatment; DNA replication; gene therapy;

(hMutT2) protein encoding cDNA.

Human MutT2

02-APR-1998 V02237 standard;

(first entry)

cDNA; 1129 BP.

Homo sapiens.

Location/Qualifiers 120..779

/product= hMutT protein"

/*tag=

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

	vector=pT7T3D (Pharmacia) with a modified polylinker host=DH10B
	(ambicitity legiscand) bitmetsimil usicet-fac i usicet-eco ut
	Liver and spleen from a 20 week-post conception male fetus. 1st
	strand cDNA was primed with a Pac I - oligo(dT) primer [5'
	AACTGGAAGAATTAATTAAAGATCTTTTTTTTTTTTTTT
	cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Pac
	I and cloned into the Pac I and Eco RI sites of the modified pT7T3
	vector. Library went through one round of normalization. Library
	constructed by Bento Soares and M.Fatima Bonaldo.
